PROFESSIONAL SUMMARY

A highly analytical Full-Stack Developer and Systems IT Professional combining 5 years of programming expertise (Python, C++, JavaScript, HTML5) with an unshakeable background in engineering mathematics, logic, and secure infrastructure. Fast-tracked into higher-level computing studies via an official 90-credit university exemption awarded for proven undergraduate STEM capabilities. Possesses distinct capabilities in secure network engineering, Linux administration, and technical problem-solving. Complements core technical engineering skills with professional experience as a Freelance Bilingual Arabic-English Interpreter, showcasing high mental agility, precision execution, and elite cross-functional communication under pressure.

TECHNICAL SKILLS

Software Development: Python, C++, JavaScript, HTML5, Object-Oriented Programming (OOP)

Systems & DevOps: Linux Administration (Kali, Ubuntu), Shell Scripting, Data Filtering (grep, wc), journalctl Logging

Networking & Security: Cisco Packet Tracer, Wireshark Packet Analysis, TCP/IP, Routing Tables, Network Protocols (ARP, DHCP, ICMP)

Design & Blueprinting: Computer-Aided Design (CAD), Multi-View Technical Drawings, 5-View Orthographic Layouts, Dimensional Tolerances

Languages: English (Higher Communication Certified / Fluent), Arabic (Native)

EDUCATION

BSc (Honours) Computing and IT

2025 – Present

The Open University — Glasgow, UK

- **Academic Fast-Track:** Awarded a prestigious 90-Credit Transfer Exemption by the Qualifications Committee based on prior rigorous undergraduate STEM coursework successfully completed at the University of Glasgow.
- **Exempted Modules:** MST124 (Essential Mathematics 1), TM111 (Introduction to Computing & IT 1), and TM112 (Introduction to Computing & IT 2).
- **Current Status:** Stage 1 curriculum fully achieved; Final EMA Submitted with results pending. Directly progressing into advanced Stage 2 software architecture, scripting languages, and network security environments.

Undergraduate Coursework (Computing & Mathematics)

2020 – 2023

University of Glasgow — Glasgow, UK

- **Software Foundations:** Cultivated intermediate software engineering frameworks, specializing heavily in foundational Python programming, structural syntax design, and core algorithmic data structures.
- **Scientific Analytics:** Successfully completed rigorous university curricula in Astrophysics, Exploring the Cosmos, and Statistics, gaining deep expertise in mapping complex data systems and utilizing statistical models for predictive logic.

Access to Engineering (1-Year Intensive Program)

Passed 2019

Glasgow Kelvin College — Glasgow, UK

- **Qualifications Achieved:** Awarded certifications in Higher Mathematics, Higher Physics, and Higher Communication in English.

- **Key Skills:** Mastered advanced quantitative logic, structural problem-solving, and professional technical writing.

NQ Level 5 Mechanical & Manufacturing Engineering

Passed 2018

Glasgow Kelvin College — Glasgow, UK

- **Engineering Architecture & Spatial Design:** Mastered complex mechanical blueprinting architectures, producing high-precision structural blueprints including Complete Multi-View Technical Drawings and Standard 5-View Orthographic Layouts using strict technical parameters.
- **Computer-Aided Design (CAD):** Deployed industrial CAD environments to map out, program, render, and simulate multi-component structural projects before actual manufacturing.
- **Full Production Lifecycle:** Engineered end-to-end multi-disciplinary manufacturing projects, controlling structural workflows from material science and property selection to physical fabrication (rolling, drilling mechanisms) and automated Computer Numerical Control (CNC) operations.
- **Technical Reporting & Analytics:** Authored detailed, rigorous project performance documentation, analytical breakdowns of raw material boundaries, and workflow integration reports.
- **Collaborative Operations:** Successfully collaborated with engineering teams to coordinate project build timelines, analyze technical constraints, and maintain strict structural safety and accuracy guidelines.

Primary & Secondary Comprehensive Schooling

2001 – 2013

Abdul Razzaq Mohieddin School & Al-Asefa Primary School — Najaf, Iraq

- **Academic Curriculum:** Completed 6 years of primary education, 3 years of intermediate secondary school, and 3 years of preparatory high school (Scientific Track).
- **Scope of Study:** Rigorously studied every single subject in the national academic curriculum, building a multi-disciplinary foundational proficiency across advanced mathematics, physics, chemistry, biology, history, Arabic, and English.

TECHNICAL PROJECTS

Full-Stack & Systems Developer

2020 – 2026

Independent & Academic Initiatives

- **Frontend Integration:** Designed and engineered responsive data management platforms using HTML5 and JavaScript to modernize legacy spreadsheet workflows into interactive, secure web tables.
- **Backend Architecture:** Developed custom data parsing scripts and server-side validation tools using Python and C++ anchored on strict Object-Oriented Programming (OOP) design patterns.
- **Infrastructure & DevOps:** Deployed applications inside custom Linux sandboxes, managing configurations, system logs via journalctl, and running terminal filters (grep, wc) to audit environment integrity.

PROFESSIONAL EXPERIENCE

Freelance Bilingual Interpreter & Translator

2024 – Present

Language Services UK Limited (LSUK) — Glasgow, UK (Hybrid)

- Deliver accurate, real-time Arabic-English verbal interpretation for complex legal and medical appointments, ensuring cross-cultural comprehension and adherence to strict confidentiality guidelines.
- Translate intricate technical and industry-specific terminology under fast-paced, high-pressure environments.

Logistics Specialist

2023 – 2026

Just Eat — Glasgow, UK

- Coordinated time-critical delivery operations with a 100% reliability rating spanning 2,400+ distinct orders.
- Performed precise analytical data tracking of vehicle operational parameters, distance metrics, and fuel optimization.

Technical Hardware Consultant*2012 – 2026**Freelance — Najaf, Iraq*

- Executed advanced hardware diagnostic routines, component-level isolation, micro-soldering, and performance tuning for custom server architectures, desktop systems, smartphones, and corporate consumer devices.
